INTRODUCTION

This publication contains listings of establishments holding licenses issued in accordance with Section 351 of an act of Congress approved July 1, 1944, entitled "Public Health Service Act" (42 U.S.C. 201, et. seq.), and products which these establishments are licensed to manufacture. Section 351 of this act is designed to regulate the sale, barter, or exchange of viruses, serums, toxins, antitoxins, vaccines, blood, blood components or derivatives, allergenic products, or analogous products, or arsphenamine or its derivatives (or any other trivalent organic arsenic compound) in the District of Columbia, in interstate and foreign commerce, and for other purposes.

The granting of a product license means that it has been demonstrated that the establishment and the product for which a license has been issued have met all applicable standards (published in Title 21, Code of Federal Regulations, Part 273) designed to insure the continued safety, purity, and potency of such products. The licenses granted to these establishments for the products mentioned do not imply an endorsement of the respective preparations nor do they make the Government a guarantor or insurer of the safety, purity, and potency of such licensed products. A license issued to an establishment to manufacture a particular product remains valid until revoked or suspended for failure of such establishment or product to comply with the applicable regulations designed to insure the continued safety, purity, and potency of such products or by voluntary surrender of such license by the manufacturer.

This publication consists of four parts:

- Part I Licensed establishments listed alphabetically with license number. This section may be used as an index to Part II as it also contains a listing of page numbers.
- Part II Licensed establishments listed numerically by license number and the products each establishment is licensed to manufacture.
- Part III An alphabetical list of biologic products with the license number of each establishment licensed to manufacture each product.
- Part IV An alphabetical list of biologic products by category.

SUBCHAPTER F—QUARANTINE, INSPECTION, LICENSING

PART 73—BIOLOGICAL PRODUCTS

Periodic Check on Sterile Techniques for Human Whole Blood

On November 12, 1971, a notice of proposed rule making was published in the FEDERAL REGISTER (36 F.R. 21696) proposing to amend Part 73 of the Public Health Service regulations by amending § 73.3004(b) to require that a periodic check on sterile technique need only be performed when Whole Blood (Human) is prepared in an open or vented system.

Views and arguments respecting such proposal were invited to be submitted within 30 days after publication of the notice in the FEDERAL REGISTER and notice was given of intention to make any amendments that were adopted effective 30 days after publication in the FEDERAL REGISTER.

After consideration of all comments submitted, the following amendment to Part 73 of the Public Health Service regulations is hereby adopted to become effective 30 days after publication in the FEDERAL REGISTER.

Dated: March 16, 1972.

ROBERT Q. MARSTON,
Director,
National Institutes of Health.

Section 73.3004(b) is amended by revising the first sentence to read as follows:

§ 73.3004 General requirements.

* * * * *

(b) *Periodic check on sterile technique.* Where blood is collected in an open system, that is, where the blood container is entered, at least one container of such blood that upon visual examination appears normal shall be tested each month between the 18th and 24th day after collection, as a continuing check on technique of blood collection, as follows: * * *

* * * * *

(Sec. 215, 58 Stat. 690, as amended; 42 U.S.C. 216, sec. 351, 58 Stat. 702, as amended; 42 U.S.C. 262).

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Public Health Service BACTERIAL VACCINES AND BACTERIAL ANTIGENS

Review of Effectiveness

In accordance with the delegation of authority (37 F.R. 4004-4005) authorizing the Director, National Institutes of Health to administer the provisions of the Federal Food, Drug and Cosmetic Act with respect to those human drugs that are biologicals subject to section 351 of the Public Health Service Act (42 U.S.C. 262), the Division of Biologics Standards is undertaking a review of the effectiveness of all licensed biologicals. The first categories of licensed products to be reviewed for this purpose will be those bacterial vaccines and bacterial antigens whose labels are required by 42 CFR 73.601(r) to state "No U.S. standard of potency."

A licensed manufacturer of such bacterial vaccines or antigens who wishes to continue manufacturing and marketing such products shall advise the Division of Biologics Standards, National Institutes of Health, Building 29, Bethesda, Md. 20014, in writing within 30 days of the publication of this notice, that he will submit substantial evidence of the effectiveness of each such product within 180 days after the publication of this notice. A manufacturer who does not within such 30-day period state that he will submit such information shall, at the end of such period cease the interstate shipment of such products and shall surrender promptly his license by mailing it to the above address. Data and information submitted pursuant to this notice shall provide the information called for in, and shall be organized in the format for, new drug applications (21 CFR 130.4 (c)(2)) to the extent applicable, and shall also include a list of each such product currently being marketed by the manufacturer specifying, (a) the trade name, if any, of each, and (b) all bacterial components of a polyvalent product.

Licensed manufacturers of products for which there is no substantial evidence of effectiveness as defined in 21 CFR 130.12(a)(5) will be so notified. Such licenses, and the licenses of those manufacturers who have not indicated timely their intention to submit the data and information called for by this notice, or who have not submitted timely such information and data, shall be surrendered promptly or proceedings will be instituted either for the revocation of the license or against shipments in interstate commerce of such products under the applicable provisions of the Federal Food,

Drug and Cosmetic Act, as may be appropriate.

Dated: March 8, 1972.

ROBERT Q. MARSTON,
Director,
National Institutes of Health.
